

13F Holdings Statement Use

13F's reveal fund stock holdings greater than 5% of the security's outstanding shares. It is a great way to analyze what stocks fund managers are buying and selling. By creating a filter that can analyze 1,000 stocks at a time, we can fly through multiple 13F's within an hour and get a feel for the investment decisions made by the leading fund managers.

To access the 13F, go to <http://www.sec.gov/edgar/searchedgar/companysearch.html>, type in the ticker and 13F for File number. Then you can access the holdings like so:

We have included a recent stock filter run on October 27, 2011. There are over 4,500 stocks in the filter. It is a great way to pick out undervalued stocks and we plug those stocks into the SNV Automated Model to find an appropriate trigger price.

Enjoy!
